

The Senior Portrait Experience

Senior portraits should be much more than just a yearbook photo!

Senior year may be the only time in your life that you will have a professional portrait session just for you. At Photography by Jane Love, my goal is to ensure that your experience is creative, fun and memorable so together we can create portraits that show your unique personality and style.

The Senior Portrait Experience begins with a personal consultation to learn as much as possible about your hobbies, interests and style.

We will discuss clothing, props and location options so we can create a senior session that is tailor-made just for you.

You choose the session that works best for you. In the studio, outdoors, or up to two hours at two locations. Bring lots of outfits because you can change clothes as often as you like.

We have some great outdoor locations to suggest or you can choose one that has meaning to you.

One to two weeks after your session, all of your best images will be presented in a custom slideshow.

Once you have selected your favorites, we will look at some great new products that are perfect for displaying senior portraits

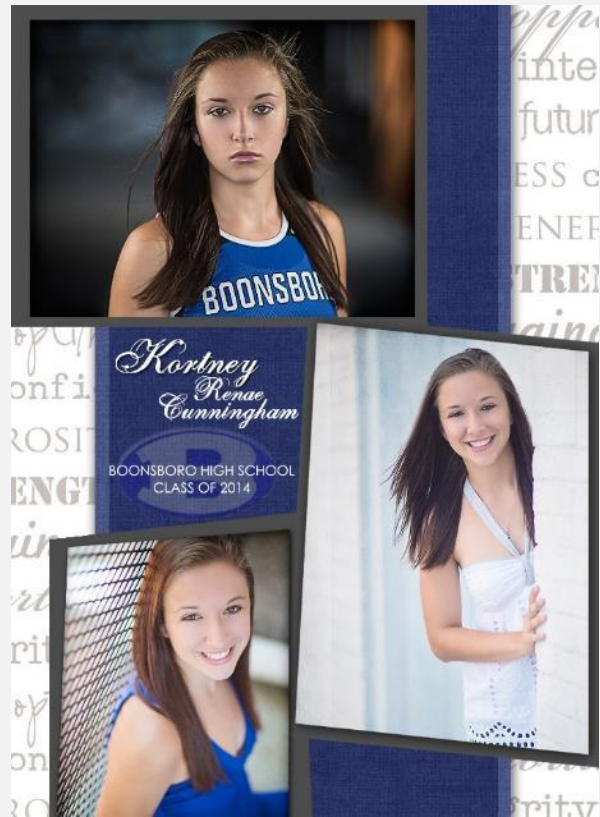

Custom Folios

Mini Accordion Albums

Senior Announcements and Invitations

Framed Prints, Canvases, metal prints and more

The final images and products that you select are totally up to you. Every final image is hand retouched at no extra charge. Depending on the session that you choose, you will have a minimum of 25-70 images to select from at your ordering appointment.

You do not have to make any final decisions until the day of your ordering appointment.

The session fee is due when booking your session. This is non-refundable, but we have many options for rescheduling.

Why settle for a “cookie cutter” senior photo when you can have a custom senior portrait experience?

If you want a memorable senior portrait experience, focusing on your unique personal style, call today for more information and to set up your consultation.
